PROCESS IMPROVEMENTS FOR CONDUCTING FIELD INVESTIGATIONS FOR THE RFI/RI WORK  
PLAN IMPLEMENTATION FOR OU 7, PRESENT LANDFILL - RLB-014-93

Attached is a list of several modifications to the Operable Unit No. 7 (OU 7) Work Plan Field Sampling Plan. These modifications are designed to reduce the resources necessary to complete the OU 7 Phase I field investigation. These modifications will not impact data quality.

All of the attached list of modifications have been discussed with the Colorado Department of Health (CDH) and the Environmental Protection Agency (EPA) field oversight personnel as well as the DOE project manager. The agency representatives have already given verbal approval for implementation of these modifications so as not to impact this project's schedule and our ability to meet Interagency Agreement (IAG) milestones.

This attachment should be transmitted to the agencies for written approval to allow for a final disposition to this issue. After approval, the OU 7 Phase I Work Plan will be changed via Document Change Notice (DCN) to reflect these modifications. Please contact T. P. O'Rourke of Remediation Project Management at extension 8577 or digital pager 5475 if you have any questions.
